

AmerisourceBergen

Oncology Supply

Five stages of a flu vaccine preorder

Stage 01

January–May

Place your preorders.

Preorder from wherever you are with convenient options including online, email, phone, or fax. You will receive a preorder confirmation email. You can add, reduce, or cancel your preorder during this window.

Stage 02

June

Purchase orders are placed with manufacturers.

All preorders are tallied to create the purchase orders that AmerisourceBergen places with our manufacturer partners. At this point, your preorders become firm orders, and no reductions or cancellations are permitted.

Stage 03

August–December

Manufacturers allocate vaccines.

As lots are approved by CBER/FDA, manufacturers allocate vaccines to distributors. AmerisourceBergen negotiates a shipping schedule; however, delays are possible. The most common delays from the manufacturer include FDA delays, manufacturing delays, weather, and truck scheduling.

Stage 04

August–December

Vaccines are shipped to you.

As vaccines are received in our distribution center, our teams process the inventory within 1–3 business days. Once shipped, you will receive two email notifications:

- Order processing confirmation with the corresponding quantity
- Shipping notice with tracking information

Stage 05

January–March

This is your vaccine return window.

At the end of the season, unused doses can be returned to AmerisourceBergen for credit based on manufacturers' terms and conditions.
