CENTER
of your practice

Nucleus is the
MARKET LEADER in
accurately tracking and
controlling inventory.

800.877.8430

Realizing that every customer is unique, Nucleus Inventory
Management System was built to offer **optimum customization.**

82,000
Nucleus Reports Generated Monthly

ICD - 10
Fully Compliant Over 27 Interfaces

Key Features

➢ Assign and view item and audit favorites on all stations within your practice.

➢ Automatically calculate waste of single dose vials, and the option to store multidose vials under the hood.

➢ Global Edit gives the ability to track all inventory items even when it is transient between clinics.

➢ Automatically e-mail scheduled reports.

➢ Scheduled dispenses allow users to pre-key future dispenses up to 40 weeks.

➢ NDC tracking is available and essential for drugs with shortage status.

➢ Automatically match and configure the items on the med order to the items stocked in Nucleus.

➢ Multi-tier approval queue to control all purchase orders to Oncology Supply from the station or web portal.

➢ Clinic Charge feature allows for removal of expired or unusable items which will not be charged to the patient, all while maintaining a 'paper trail'.

➢ Nucleus offers the ability to reprint labels and receipts.

Nucleus Portal - https://nucleus2.oncologysupply.com

➢ The Portal allows users to access billing and cost information in a HIPAA compliant manner from their own workstation.

➢ Easily view real time inventory levels across all dispensing stations, assign items to your stations, and manage and approve purchase orders.

➢ Edit lists of physicians, waste, returns, and inventory discrepancy reasons, as well as other item settings across all of your stations.

➢ View all Nucleus data from any computer that can access a secure web page.

➢ Our web-based application uses the latest and most secure communication protocols.

Dedicated Report Analyst can customize reports for your practice at no charge.
